Introduction

I have a passion for solving problems, constantly improving and learning, and creating dynamic web-based business solutions. My expertise lies in front-end development, illustration, and design.

Experience

Killer Shark Marketing
Web Developer/Designer

February 2015 to Present

Designed and developed many websites and branding packages in a fast pace environment utilizing all of my skillset.

Market Craft Technologies
Co-Founder and Lead Web Developer/Designer

January 2013 to 2015

Lead a small team of creatives working on multiple projects, ranging from eCommerce to business website development. Held responsibilities in debugging back-end and front-end problems. Curated the design and spearheaded the integration of HTML, CSS, jQuery, responsive frameworks, and proper marketing techniques.

Guy Gunter & Associates
Lead Web Developer and Designer

December 2012 to 2015

Worked directly for an appliance company developing their eCommerce (Django) experience, business branding and web presence. Managed a team of developers aggregating tens of thousands of products.

Freelance Illustration
Designer & Illustrator

2009 - Present

Freelance art and design working with clients in the music industry. Creating a niche style marketed towards a target audience designing album covers, t-shirts, skateboards and logos.
